## **Operating Details of ASE Sanitol SM 29, 29A, 30 & 31**

ASE SANITOL SM 29, 29A, 30 & 31 can be mounted on walls, cupboards or below beams, giving optimum purification process.

UV Air Purification Circulator utilizes UV light to shine onto the 2 nanometers in diameter TIO<sub>2</sub> coated surface of the Metal Air Circulator to produce Photo-catalyst reaction. Air in the enclosed room is sucked into the Circulator by a suction fan bringing along VOCs, and other contaminations that will be broken down into non toxic inorganic matter upon Photo-catalyst reaction.

For initial usage it is recommended to run the purifiers 24 hours a day to rid the room of any VOCs and contaminants. After a few days, there will a noticeable difference in the air quality, the purifiers can be switch on for about 8 hours a day depending on the situation or when it is necessary. The purifiers are heavy duty and can operate 24 hours a day. On and off switch is at the side of the purifiers and is easily to operate.

ASE Sanitol SM29A is suitable for office and household. SM29, 30 & 31 are bigger and more suitable for area where a high level of air pollution exists such as pubs, kitchens, restaurants, supermarkets and factories.

### **Care and Cleaning**

1. Always disconnect the power cord before cleaning or replacing parts
